Subject: Re: Dual Confirmation Prerequisite Waiver for Algorithms and Data Structures (COMP20003)

Hi Laurence,

Thank you for your email.

Based on the information you have provided, and noting that Grady is also comfortable with this, I am comfortable with you being granted conditional entry into COMP20003.

Just in case it is helpful, I have attached the subject overview and syllabus from last year. Please have a look through them and let me know if you have any questions or concerns about whether you are ready for the subject.

Regards,
Guang Hu

Subject: Dual Confirmation Prerequisite Waiver for Algorithms and Data Structures (COMP20003)

Dear Guang Hu

My name is Laurence Wang, and I am a third-year Bachelor of Commerce student planning to complete the Diploma in Computing. As part of the diploma, I am must enrol in COMP20003 Algorithms and Data Structures next semester. I understand that the official prerequisite is COMP10002 Foundations of Algorithms, which I have not completed formally. However, I have covered the relevant prerequisite material independently through CS50, Algorithms Illuminated, and related self-study in programming and algorithms. I have already contacted Grady Fitzpatrick who I was informed will be co-teaching this subject with you, and she has indicated that she is very comfortable with me receiving conditional entry into COMP20003. I would also be very happy for you to confirm this with her directly if needed.

Since I understand that you are the principal coordinator for the subject next semester, Stop 1 has asked me to also obtain confirmation from you. Would you be able to confirm that you are comfortable with me being granted conditional entry into COMP20003? A brief reply would be sufficient for Stop 1's purposes.

Thank you very much for your help.

Kind regards, Laurence Wang
